Principais competências

C#
Windows Azure
SQL

Languages

Português (Native or Bilingual)
Inglês (Professional Working)

Certifications

Scrum Fundamentals Certified (SFC)

.NET 6 e Identity: implementando controle de usuário (Fev/2025)

.NET: gerenciamento de memória para otimização de performance (Fev/2025)

.NET: persistindo dados com Entity Framework Core (Fev/2025)

Microserviços e .NET6: implementando a comunicação (Fev/2025)

Lucas Gomes

Software Engineer | Backend Developer | .NET & Azure | APIs | SQL | Cloud Solutions | C# | Python
São Vicente, São Paulo, Brasil

Resumo

Software Engineer with 5+ years of experience building backend solutions, APIs and cloud-based systems. Experienced in developing and maintaining C#/.NET APIs, database modeling and optimization (SQL Server), Python ETL processes and Azure cloud solutions. Passionate about scalable architectures, system integrations and performance optimization. Core skills: • C# / .NET • Azure Cloud • SQL Server / PostgreSQL / MongoDB • Python & ETL • REST APIs • TypeScript Open to international opportunities involving backend engineering, cloud solutions and distributed systems.

Experiência

BDS DataSolution

5 anos 4 meses

Mid Software Engineer II

janeiro de 2026 - Present (5 meses)

Сантус, SP

- Developing backend solutions and complex integrations using .NET and Azure technologies.
- Delivering scalable and high-performance systems with focus on reliability and maintainability.
- Designing and maintaining APIs, microservices and distributed integrations.
- Optimizing relational database performance.
- Participating in technical decisions, architecture discussions and strategic initiatives.
- Supporting knowledge sharing and collaboration across development teams.

Mid Software Engineer I

fevereiro de 2024 - janeiro de 2026 (2 anos)

Сантус, SP

- Designed, developed and maintained backend solutions focused on scalability, performance and system integration.
- Built and enhanced REST APIs using .NET/C#.

- Structured, optimized and maintained SQL Server and PostgreSQL databases.
- Developed ETL processes and automation scripts using Python.
- Contributed to technical analysis and solution design.
- Participated in cloud projects using Azure services.

Junior Software Developer III

janeiro de 2023 - fevereiro de 2024 (1 ano 2 meses)

Сантус, SP

- Developed scalable APIs and microservices supporting business operations.
- Implemented asynchronous integrations and event-driven processes.
- Improved backend performance through SQL optimization and application enhancements.
- Developed and maintained ETL pipelines using Python.
- Participated in technical discussions and architectural improvements.
- Monitored, analyzed and resolved production issues.

Junior Software Developer I

fevereiro de 2022 - janeiro de 2023 (1 ano)

São Paulo, Brasil

- Developed and maintained backend solutions and APIs using .NET/C#.
- Implemented integrations between internal and external systems.
- Created and optimized SQL queries to improve performance and reliability.
- Participated in ETL processes for data transformation and processing.
- Supported incident resolution and continuous system improvements.
- Collaborated with cross-functional teams in Agile environments.

Systems Development Intern

fevereiro de 2021 - janeiro de 2022 (1 ano)

Сантус, SP

- Assisted in the development and maintenance of internal systems and applications.
- Supported API development and integration using C#.
- Created and maintained SQL queries for data extraction and processing.
- Contributed to database maintenance and optimization activities.
- Worked within Agile methodologies (Scrum/Kanban) to deliver solutions.
- Assisted with bug fixing, testing and continuous improvements.

Formação acadêmica

Fatec Baixada Santista Rubens Lara

Tecnólogo em Análise e Desenvolvimento de Sistemas , Tecnologia da Informação · (janeiro de 2020 - julho de 2025)

ETEC - Escola Técnica Estadual de São Paulo

Técnico em Informática, Tecnologia da Informação · (2018 - 2019)
